101 ELECTRONICS PAGE 2 www 101science com

Maximum speed 10 MHz Extremely high input impedance and inputs will float if not pulled high or low Power consumption virtually zero if not switching rising with switching speed

Ultrasound Therapy Electrotherapy

As it is difficult if not impossible to know the thickness of each of these layers in an individual patient average half value depths are employed for each frequency

Understanding Antennas For the Non technical Ham by N4JA

PREFACE One reason for writing this book is to educate you so you can make an informed choice concerning the best antenna for you Another reason is to dispel the many antenna myths that circulate in the amateur community

Older Questions amp Answers 1 Ask the Physicist

With the recent publication of PHYSICS IS there are now three Ask the Physicist books Click on the book images below for information on the content of the books and for information on ordering

Introduction to quantum mechanics Wikipedia

Quantum mechanics is the science of the very small It explains the behavior of matter and its interactions with energy on the scale of atoms and subatomic particles By contrast classical physics explains matter and energy only on a scale familiar to human experience including the behavior of astronomical bodies such as the Moon Classical physics is still used in much of modern science and

2 KM FM Transmitter Detailed Working with Circuit Diagram

2 KM FM Transmitter Detailed Working with Circuit Diagram Hi I am really excited reading all the comments and the answers from the instructor of the circuit above

Why are plants green ResearchGate

Read 242 answers by scientists with 264 recommendations from their colleagues to the question asked by Ralf G Niemann on Aug 17 2012

How much wind power can a grid handle Â« JoNova

The total installed wind farm capacity for South Australia is 1576 MW The State of Victoria has an ambitious plan to move from the present 1242 MW of installed wind farms to add 3000 to 4000 MW to provide 20 to 30 of the electricity demand from wind power

Infrastructure Atomic Rockets

As the delta V for a mission goes up the amount of propellant required goes up exponentially or looking at it another way the amount of payload shrinks exponentially Large amounts of propellant are expensive but the higher the mass ratio the higher the likelihood that the spacecraft will not be reusable
