Brief History of Mycology Fungi Biology Discussion

The fact that yeasts were associated with fermentation announced independently by C. C. de la Tour 1836 T. Schwann 1837 and F. T. Kützing 1837 opened new vistas in commercial exploitation of Fungi.

Spawn biology Wikipedia

Spawn is the eggs and sperm released or deposited into water by aquatic animals. As a verb to spawn refers to the process of releasing the eggs and sperm and the act of both sexes is called spawning. Most aquatic animals except for aquatic mammals and reptiles reproduce through the process of spawning. Spawn consists of the reproductive cells of many aquatic animals some of which will

Soil quality â€“ A critical review ScienceDirect

Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However the choice of relevant soil attributes and interpretation of measurements are not straightforward because of the complexity and site specificity of soils. Legacy effects of previous land use and trade offs between ecosystem services

Evolution Wikipedia

In the 1920s and 1930s the so called modern synthesis connected natural selection and population genetics based on Mendelian inheritance into a unified theory that applied generally to any branch of biology. The modern synthesis explained patterns observed across species in populations through fossil transitions in
